Smart workplace security

Integrating cloud based access control, CCTV, visitor management solutions, smart entry technologies and alarm systems to deliver secure, controlled workspace access and peace of mind.

"
The team at iwGROUP has a proactive (and friendly) approach. As part of our building refurbishment, they upgraded our access control and security system to integrate with our existing management tools. Their expertise has improved processes and maximised the potential of the technology; all our requirements were fully met.
"

TRAVEL | Airports, stations, ferry ports & car parks

iwGUARD

Seeing exactly what's happening in your workspace is essential. Access control, visitor management, CCTV and alarm systems provide integrated layers of security. Along with people flow management tools, our solutions ensure a superior user experience, while providing insights that optimise operations, boost workplace security, and maximise ROI.

Access control
Controlled access for secure spaces

Visitor management
Seamless access and vital insights

CCTV
Empowering safety through intelligent eyes

Alarm systems
Protecting your space, data and people

Integration
A fusion of tailored solutions for complete security

The power of integration

From controlling access to monitoring activity and managing visitors, today's commercial security is all about intelligent integration. At iwGROUP, we deliver tailored, connected systems that work seamlessly together, boosting protection, streamlining operations and unlocking data-driven insight.

We transform workspace security into a unified, proactive and scalable platform.

Access control
Controlled access for secure spaces

Unified access control systems improve security, reduce admin and support compliance. Unlock doors with mobile, Apple Wallet or QR codes - no fobs needed.

We integrate with CCTV, analytics, visitor platforms, and sector-specific tools, such as OfficeRnD or membership apps, giving you complete control and seamless functionality across every site.

Visitor management
Seamless access + vital insights

Seamless, secure entry with Apple Wallet, timed QR codes or Apple CarPlay.

We integrate our visitor management solutions with access control, ANPR, room booking systems and people flow tools to simplify access, monitor movement and deliver actionable insights.

The result? Smoother journeys, smarter security and stronger ROI.

CCTV
Empowering safety through intelligent eyes

Protect your spaces with crystal-clear CCTV, available in cloud or on-premises setups. With AI-powered cameras, onboard analytics and remote access, you get faster alerts and efficient monitoring.

Integrate facial authentication and cloud-based access control for a scalable, future-ready security solution that adapts to every site.

Alarm systems
Protecting your space, your data and your people

Integrated with CCTV and access control, our alarm systems work in sync to provide footage and access logs, delivering a clearer picture of every event. This is further enhanced by linking with fire alarm systems, enabling automatic door releases during emergencies and providing safer evacuation and rapid access for emergency services.

This seamless integration enhances incident visibility, helping teams act quickly and with confidence.

Integration
A fusion of tailored solutions for complete security

As a vendor-agnostic provider, we use open API platforms to integrate access control, CCTV and alarms with your existing systems, including SSO, Teams, Zoom and management tools.

Our strategic integrations enhance security, improve operational efficiency and unlock valuable data insights. Every solution is customised to protect your people, property and information.

Our commitment

Unify | Empower | Sustain

We understand the challenges surrounding workspace technology and our integrated solutions are tailored to address them. Unified in vision and goals, iwGROUP serves as one centralised provider. Fusing strategy, design, deployment and support we create a unique, cohesive framework, enhancing user experiences, streamlining workflows and boosting business efficiencies. We're committed to driving positive change and propelling businesses toward future-ready and sustainable growth.

Our approach

Unrivalled service | Relationships that last

Providing unmatched service that prioritises trust, excellence and lasting relationships is central to our ethos. By focusing on understanding your business, people and goals, we ensure the highest standard of service and communication throughout your journey with us. You'll have a dedicated Account Director and Project Manager to support you every step of the way.
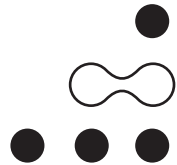

> " *iwGROUP are always on hand to offer support to me in the office, whether it's meeting room tech, Wi-Fi, door access or laptops. Quick and efficient support means the office can run more smoothly, which frees up time for other tasks.* "
