intelligent workspaces

# Intelligent technologies for future workspaces

Version 1.0

[www.iw.group](http://www.iw.group)

**intelligent workspaces**

# Welcome

**C**onventionally, workspaces use many technology companies to manage their locations, devices, and services. At **iw**GROUP, we simplify and demystify the technology landscape by providing comprehensive solutions across an umbrella of 6 key tech specialisms – our tech stack.

From initial concept and design, to installation and support, we serve as one single contact and project owner. Our intelligent workplace solutions go beyond individual technologies, focusing on bespoke designs, strategic planning and seamless integration. This approach delivers significant cost efficiencies, future-ready spaces and sustainable growth.

**Intelligent** technologies for future **workspaces**

Intelligent technologies for future workspaces

# Workspaces

Versatile solutions for every industry sector...

**OFFICES** | Co-working spaces, headquarters & studios

**INDUSTRIAL** | Warehouses, factories & distribution depots

**CONSTRUCTION** | Developers, agents, landlords & architects

**RETAIL** | Supermarket chains, retail parks & motorway services

**HEALTHCARE** | Hospitals, clinics & doctor surgeries

**EDUCATION** | Universities, colleges & schools

...focusing on people and their environment

**HOSPITALITY** | Hotels, cinemas & theatres

**LEISURE** | Restaurants, private clubs & spas

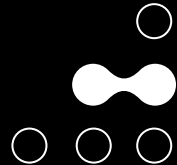

**RECREATION** | Gym chains, racecourses & festivals

**STADIUM** | Premier League & national stadiums

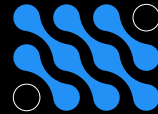

**MUNICIPAL** | Public spaces, parks & sports centres

**TRAVEL** | Airports, stations, ferry ports & car parks

# Our specialisms

**O**ur comprehensive tech stack, consisting of six technology areas, is delivered exclusively by **iwGROUP**. Fully customisable, we provide individual products and services for specific spaces or seamlessly integrate a range of selected components into scalable solutions, tailored to enhance and future-proof your entire property portfolio.

By eliminating the need for multiple suppliers, we deliver strategic, cohesive technology designs that optimise your space while aligning with your business needs, environment, and people. With a deep understanding of the evolving workplace, shifting work patterns, and the latest innovations, we ensure our technology solutions adapt to change and work for you.

Keeping networks, connectivity and infrastructure up to date is vital to support business growth. We specify and implement IT strategies that are future-ready, scalable and robust. Installation and management of these technologies are meticulously overseen to ensure optimum capability and effectiveness.

## Connectivity

High-speed internet for businesses

## Networking + infrastructure

Fusing streamlined networks & cloud infrastructure

## Cyber security

Navigating security in a connected world

## Enterprise IT

Project support from conception to completion

## Virtual CTO

Strategic guidance, digital excellence

Colour management, print and proofing solutions delivered with unrivalled service levels. Combine the latest products from leading manufacturers, then colour match to calibrate monitors, proofers and laser printers. This ensures seamless integration and reliable ongoing performance, all customised to meet unique business needs.

### **Managed print**

Elevated efficiency via sustained support

### **Colour calibration**

Colour precision excellence

### **Large format + monitors**

When colour and resolution are critical

### **Contract proofing**

Accuracy in design

### **Creative workflows**

Process automation for complete control

Seeing exactly what's happening in your workspace is essential. Access control, visitor management, CCTV and alarm systems provide integrated layers of security. Along with people flow management tools, our solutions ensure a superior user experience, while providing insights that optimise operations, boost workplace security, and maximise ROI.

### **Access control**

Controlled access for secure spaces

### **Visitor management**

Seamless access and vital insights

### **CCTV**

Empowering safety through intelligent eyes

### **Alarm systems**

Protecting your space, data and people

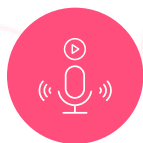

### **Integration**

A fusion of tailored solutions for complete security

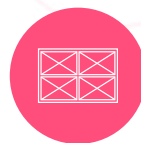

When technology converges with creativity, the possibilities for workspace design become limitless. Versatile AV and acoustic designs deliver inspiring video conferencing and collaboration environments, streamlined with meeting room booking systems. Bespoke video walls, digital signage and podcast booths take branding experiences to a new level.

### **AV solutions**

Sound and visuals seamlessly converging

### **Video walls + digital signage**

Innovative branding technologies

### **Podcast booths**

Contemporary spaces to empower your brand

### **Acoustic solutions**

Maintaining privacy and clear communication

### **Meeting room booking systems**

Seamless meeting room management  
any time, anywhere

Intelligent sensors monitor temperature, air and water quality in workspaces. They also control smart lighting, heating, air conditioning, refrigeration, or individual devices. Through machine learning, the data from these sensors is analysed to help monitor energy consumption and optimise efficiencies, reducing operating costs and carbon emissions.

### **PropTech automation**

Revolutionising your property management

### **HVAC + smart lighting**

The future of smart workspaces

### **Smart building design**

Elevating your building with smart integration

### **Workplace wellbeing**

Breathe easy with the power of machine learning

### **Energy management**

Monitor, manage, maximise

# iwCONNECT

Intelligent AI-powered business telephony that empowers people and enhances every conversation. By combining smart call routing, real-time insights and seamless system integrations, we support teams rather than replace them. This enables more efficient, informed and human communication across all devices and locations, transforming how organisations connect with their customers.

### AI-powered calls

Smarter conversations, guided by real-time insight

### Natural conversation

Empowering spaces through precision

### Actionable insights

Elevating security, ensuring trust

### Seamless integrations

Taking back control of your mobile business assets

### Built to scale

Seamless security, smartly triggered by motion

# Office moves

**A**n office move signals growth and opportunity, but handling the technology side can be challenging. That's where **iwGROUP** comes in. Our experienced team creates a robust, considered and well-aligned plan to ensure a smooth, on-budget, and stress-free move, tailored to meet your organisation's needs.

## Technology migration

### Worry-free tech transitions

Our team will be working alongside you to allay any concerns as well as identifying and remedying potential challenges. We're here to ensure your successful relocation. Our approach means you will be guided through the key office move considerations. From start to finish, including network setup and connectivity, to seamless integration, access control and AV installation, we'll take care of everything so that you can focus on your business without the worry of any downtime or data security.

## Collaborative solutions

### Partnering for success

Our team is industry renowned for easing the stress of office relocations, and working seamlessly with interior designers, architects, and office fit-out companies. At **iwGROUP**, we understand the importance of teamwork, timing, and clear communication. During the move, we provide on-site support and conduct thorough testing of all systems to confirm everything is functioning flawlessly. We'll also provide training for your team on the new systems to ensure full adoption and ease of use.

## Assessment + discovery

### The foundations for a successful move

The process starts with a thorough evaluation of your current and new office locations, to identify infrastructure requirements and potential challenges. We audit your existing technology, including hardware, software, and networks, to determine what can be kept, and what needs upgrading or migrating. Employee and stakeholder feedback is important to us to ensure that we align our plan with your specific business goals and enhance end-user experience.

## Plan, design + deploy

### Strategic development + project management

We create a detailed technology blueprint and timeline to ensure seamless infrastructure setup and integration for your new workspace. Our team efficiently allocates resources, focusing on operational planning to minimise risks like downtime and data loss. Establishing high-speed connectivity is crucial, and our phased migration plan reduces disruptions while allowing smooth testing. A dedicated Project Manager oversees the entire process, providing full visibility and coordination. Flexibility in design ensures your space is optimised, maximising ROI and adding long-term value.

## Post-move optimisation

### Continuous monitoring and growth

After your move, we offer follow-up support to resolve any issues and optimise system performance, backed up with comprehensive documentation of your new technology environment. It's vital to us that your office technology is scalable for future growth so we offer ongoing monitoring and regular reviews to keep your systems secure and completely up-to-date.

# Simplifying every client journey

**A**t **iw**GROUP, we deliver all workspace technologies and services through one specialist team, ensuring maximum efficiency and ROI. From planning and design to deployment and ongoing support, we oversee your entire project lifecycle.

With expertise across myriad industries and a strategic, vendor-agnostic approach, we tailor our tech designs to be scalable and flexible to your unique requirements. We ease your path to a future-ready, people-centric workspace by eliminating the complexities of the technology landscape. Unrivalled support, guidance and industry knowledge are the cornerstones of our lasting client relationships.

## Our commitment

### Unify | Empower | Sustain

We understand the challenges surrounding workspace technology, and our integrated solutions are tailored to address them. Unified in vision and goals, iwGROUP serves as one centralised provider. Fusing strategy, design, deployment, and support we create a unique, cohesive framework, enhancing user experiences, streamlining workflows, and boosting business efficiencies. We're committed to driving positive change and propelling businesses toward future-ready and sustainable growth.

## Our approach

### Unrivalled service | Relationships that last

Providing unmatched service that prioritises trust, excellence, and lasting relationships is central to our ethos. By focusing on understanding your business, people, and goals, we ensure the highest standard of service and communication throughout your journey with us. You'll have a dedicated Account Director and Project Manager to support you every step of the way.
